STEP-BY-STEP PROCEDURE

- HUD accepted consultant who prepares this work write-up (or an architect, engineer or home inspection service) needs to inspect the property to assure: (1) That there are no rodents, termites and other infestations: (2) that there are no defects that will affect the health and safety of the occupants: (3) the adequacy of the existing structural, heating, plumbing electrical and roofing system: and (4) the upgrading of thermal protection (where necessary). The inspection report will be attached to the document.
- Complete each item below as necessary by either filling out the information on the work to be preformed with a brief explanation, or entering "NONE" in the "SUB-TOTAL" Portion if no work is being performed in that particular subsection to the document.
- The proposed work, and the materials used, should be explained in detail to assure a complete understanding on the required work by the contractor and the HUD authorized fee inspector. For major items (ie. kitchen cabinets, appliances, heating air conditioning etc.), the description or the item should enclose the make and model number (manufacturer's) brochure can be attached).
- Attach a copy of any proposals from all contractors and/or subcontractors.
- Provide other drawings as necessary to assure a complete understanding of the required work by the contractor and the HUD authorized fee inspector. The following architectural exhibits are required:
 - A Plot Plan of the Site is required only if a new addition is being made to the existing structure. Show the location elevations at the property corners and building structure(s), walks, drives, streets, and other relevant detail. Include finished grade corners to assure proper drainage of water off the site. Show the required flood elevation.
 - Proposed Interior Plan of the Dwelling. Show where structural or planning changes are contemplated; include any dwelling.
 - Provide kitchen cabinet elevations, deck drawings and other exhibits as necessary to properly describe the required Architectural exhibits for a new addition are the same as for a newly constructed home.
- Cost estimates must include labor and materials sufficient to complete the work by a contractor.
- A homebuyer who would like to do any of the work must submit a letter to the lender stating his/her qualifications to perform the work in timely and workmanlike manner. If approved by the lender, the homebuyer cannot eliminate the cost estimate for labor because if the homebuyer cannot complete the work there must be sufficient money in the escrow account to get a subcontractor to do the work.
- If this is a purchase transaction and not a refinance, then attach a sales contract (the loan should go contingent upon obtaining FHA 203(k) financing).
- Transfer costs shown on the last page to the Draw Request (HUD 9746-A, VMP-436).
- Meaning of Abbreviations:

Each = Ea Linear foot = LF Square Foot = SF Lump Sum = LS Square Yard = SY * = Required

M = Mandatory By HUD, R = Recommended By Consultant/Other, D = Desired By Homeowner

I hereby certify that I have carefully inspected the following property at: **2022 Austin Rd
Walled Lake, Michigan**

for compliance with the general acceptability requirements (including health and safety) in Handbook 4905.1 or its successors.

I have reviewed the attached architectural exhibits and the estimated rehabilitation costs of this property, and have determined them to be acceptable.

I have no personal interest, present or prospective, in the property, applicant, or proceeds of the mortgage.

To the best of my knowledge I have reported all items requiring correction and that the rehabilitation proposal now meets all HUD requirements for 203(k) Rehabilitation Mortgage Insurance (Handbook 4240.4 or its successors).

203K CONSULTING/INSPECTION/OPTIONS/FEEES

1. **Pre Purchase Inspection:** Perform a Pre Purchase Inspection and provide a written report. The inspection is strongly recommended for any property that is being purchased and is the recommended starting point. The FHA 203K mortgage program requirements will be discussed during the inspection, but no separate report is generated. No additional fee for discussing the program is charged. The client's contractor is encouraged to attend. A written report is generated and typically sent via email. The fee is due upon completion of the field inspection. A sample inspection report is available for your review. The inspection can be performed in conjunction with other services.
2. **Feasibility Study:** The study reviews the property for compliance for Minimum Property Standards (MPS) as set for by the Department of Housing and Urban Development (HUD) and also includes desired items the client may wish to include in the renovation. The study includes a description of the renovation items and preliminary cost estimate (Cost estimate is very general). The study will also advise as to which 203K program can be utilized. Should the loan progress to a 'Full' 203K, then the cost of the study is credited toward the drafting of the required documents for the 'Full' 203K program. The Feasibility Study should not be confused with a Pre Purchase Inspection which is recommended on any property that is being purchased. The client's contractor is encouraged to attend. A written report is generated and typically sent via email. The report can be utilized to assist with contractor bids. The fee is due upon completion of the field inspection. A sample study is available for review. The study can be performed in conjunction with other services.
3. **Specification of Repairs:** Basically this is a detailed cost estimate and offers more detail than a Feasibility Study. Also other required forms are completed and included in the package. The format is dictated from HUD and is required for the 'Full' 203K program. A sample inspection report is available for your review. A written report is generated and typically sent via email. The fee may be allowed to be paid at closing with the lender's and consultant's permission. The client's contractor is encouraged to attend.
4. **Hourly Basis:** Specifically for the Streamlined program to assist in coordination of contractor bids and required paperwork.

Consultant's Allowable Fee Agreement

Lender: John Adams
 Loan Originator: David Kner
 Loan Type: HUD 203(k)

This agreement is entered on 5/7/2012, between Christopher J. Daggy (CONSULTANT) and
Ian Wadden (BUYER) regarding the subject property:
2022 Austin 1 NW, Michigan.

For the sum(s) specified the CONSULTANT agrees to:

1. Meet with Borrower(s) and / or Borrower(s)' Agent(s) and/or Contractor(s) at the subject property address to inspect the physical property, identify area in need of improvement, and determine overall suitability for FHA's 203(k) Rehabilitation Mortgage Program. A feasibility fee of \$125 plus mileage (\$.485/mile over 30 miles round trip) will be due and payable upon completion of these services. This fee will fully credited toward the Total Consultant Fee (below) should Borrower(s) decide to continue the application process. This fee is non-contingent and non-refundable. If upon initial examination it is determined quickly that the need repairs are unfeasible for the Borrower(s) and/or excessively expensive, the Consultant will not perform a full Home Inspection (if contracted to perform inspection) and no additional payment will be necessary.
2. With Borrower(s)' input, Consultant will list work items that: A) must be done according to the Program; B) would be recommended to be done at this time by the Consultant or other, and; C) are desired by Borrower(s). From this list Consultant and Borrower(s) will jointly determine the scope of the work.
3. Produce appropriate documentation in a HUD accepted format the Draw Request. It is understood that any architectural exhibits do not include certified architectural drawings. If such drawings become necessary, all extra costs will be the responsibility of the Borrower(s).
4. For performing the above services, Borrower(s) agrees to pay Consultant the total sum listed down below at the time of service at the time of service (which includes the charge for item #1 above) which is based on HUD's recommended fee schedule. This amount may be reimbursed to the borrower at closing. Consultant may elect to defer collection of payment till closing, but if the property fails to close by the estimated date the Borrower(s) will be responsible for immediate payment to the Consultant. The Lender must agree to this payment method.
5. If additional testing services are necessary, these services will either be provided by the Consultant or qualified sub contractor(s) agreed to by both the Consultant and the Borrower; however the charges for these testing services are in addition to the above Consultant Fee. The Consultant will try to estimate all extra charges in advance (see below), and may schedule the additional testing for the Borrower(s). The charges, however, will be the sole responsibility of the Borrower(s) and will be due and payable at the time of service.

THIS AGREEMENT, made this date, _____, between the above mentioned Homeowner (Owner) and Contractor, is for the rehabilitation of the property located at _____ that has been approved for FHA mortgage insurance under Section 203(k) of the National Housing Act. The Owner(s) shall pay the Contractor the sum of \$_____ for completion of the work, including all sales tax due by law, together with such increases or decreases in the contract price as may be approved in writing by the Lender. The work will begin within 30 days of loan closing with the Lender and will be completed by _____, unless delayed beyond the Contractor's control. The General Provisions listed below are made a part of this Agreement. The contract documents consist of the architectural exhibits listed in the Rehabilitation Loan Agreement between the Owner(s) and the Lender, or as described below (or on an attached sheet):

1. Contract Documents: This Agreement includes all general provisions, special provisions and architectural exhibits that were accepted by the lender. Work not covered by this agreement will not be required unless it is required by reasonable inference as being necessary to produce the intended result. By executing this Agreement, the contractor represents that he/she has visited the site and understands local conditions, including state and local building regulations and conditions under which the work is to be performed.

2. Owner: Unless otherwise provided for in the Agreement, the owner will secure and pay for necessary easements, exceptions from zoning requirements, or other actions which must precede the approval of a permit for this project. If owner fails to do so then the contract is void. If the contractor fails to correct defective work or persistently fails to carry out the work in accordance with the agreement or general provisions, the owner may order the contractor in writing to stop such work, or a part of the work, until the cause for the order has been eliminated.

3. Contractor: The contractor will supervise and direct the work and the work of all subcontractors. He/she will use the best skill and attention and will be solely responsible for all construction methods and materials and for coordinating all portions of the work. Unless otherwise specified in the Agreement, the contractor will provide for and/or pay for all labor, materials, equipment, tools, machinery, transportation, and other goods, facilities, and services necessary for the proper execution and completion of the work. The contractor will maintain order and discipline among employees and will not assign anyone unfit for the task. The contractor warrants to the owner that all materials and equipment incorporated are new and that all work will be of good quality and free of defects or faults. The contractor will pay all sales, use and other taxes related to the work and will secure and pay for building permits and/or other permits, fees, inspections and licenses necessary for the completion of the work unless otherwise specified in the Agreement. The contractor will indemnify and hold harmless the owner from and against all claim, damages, losses, expenses, legal fees or other costs arising or resulting from the contractors performance of the work or provisions of this section. The contractor will comply with all rules, regulations, laws, ordinances and orders of any public authority or HUD inspector bearing on the performance of the work. The contractor is responsible for, and indemnifies the Owner against, acts and omissions of employees, subcontractors and their employees, or others performing the work under this Agreement with the contractor. The contractor will provide shop drawings, samples, product data or other information provided for in this Agreement, where necessary.

4. Subcontractor: Selected by the contractor, except that the contractor will not employ any subcontractor to whom the owner may have a reasonable objection, nor will the contractor be required by the owner to employ any subcontractor to whom the contractor has a reasonable objection.

5. Work By Owner or Other Contractor: The owner reserves the right to perform work related to the project, but which is not a part of this Agreement, and to award separate contracts in connection with other portions of the project not detailed in this Agreement. All contractors and subcontractors will be afforded reasonable opportunity for the storage of materials and equipment by the owner and by each other. Any costs arising by defective or ill-timed work will be borne by the responsible party.

6. Binding Arbitration: Claims or disputes relating to the Agreement or General Provisions will be resolved by the Construction Industry Arbitration Rules of the American Arbitration Association (AAA) unless both parties mutually agree to other methods. The notice of the demand for arbitration must be filed in writing with the other party to this Agreement and with the AAA and must be made in a reasonable time after the dispute has arisen. The award rendered by the arbitrator(s) will be considered final and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

Borrower's Initial: _____

Contractor's Initial: _____

Signature Required on Page 2

7. Cleanup and Trash Removal: The contractor will keep the owner's residence free from waste or rubbish resulting from the work. All waste, rubbish, tools, construction materials, and machinery will be removed promptly after completion of the work by the contractor.

8. Time: With respect to the scheduled completion of the work, time is of the essence. If the contractor is delayed at anytime in the progress of the work by change orders, fire, labor disputes, acts of God or other causes beyond the contractor's control, the completion schedule for the work or affected parts of the work may be extended by the same amount of time caused by the delay. The contractor must begin work no later than 30 days after loan dosing and will not cease work for more than 30 consecutive days.

9. Payments and Completion: Payments may be withheld because of. (1) defective work not remedied; (2) failure of contractor to make proper payments to subcontractors, workers, or suppliers; (3) persistent failure to carry out work in accordance with this Agreement or these general conditions, or (4) legal claims. Final payment will be due after complete release of any and all liens arising out of the contract or submission of receipts or other evidence of payment covering all subcontractors or suppliers who could file such a lien. The contractor agrees to indemnify the Owner against such liens and will refund all monies including costs and reasonable attorney's fees paid by the owner in discharging the liens. A 10 percent holdback is required by the lender to assure the work has been properly completed and there are no liens on the property.

10. Protection of Property and Persons: The contractor is responsible for initiating, maintaining, and supervising all necessary or required safety programs. The contractor must comply with all applicable laws, regulations, ordinances, orders or laws of federal, state, county or local governments. The contractor will indemnify the owner for all property loss or damage to the owner caused by his/ her employees or his/her direct or subtier subcontractors.

11. Insurance: The contractor will purchase and maintain such insurance necessary to protect from claims under workers compensation and from any damage to the owner(s) property resulting from the conduct of this contract.

12. Changes in the Contract: The owner may order changes, additions or modifications (using form HUD-92577) without invalidating the contract. Such changes must be in writing and signed by the owner and accepted by the lender. Not all change order requests may be accepted by the lender, therefore, the contractor proceeds at his/her own risk if work is completed without an accepted change order.

13. Correction of Deficiencies: The contractor must correct promptly any work of his/her own or his/her subcontractors found to be defective or not complying with the terms of the contract.

14. Warranty: The contractor will provide a one-year warranty on all labor and materials used in the rehabilitation of the property. This warranty must extend one year from the date of completion of the contract or longer if prescribed by law unless otherwise specified by other terms of this contract. Disputes will be resolved through the Construction Industry Arbitration Rules of the American Arbitration Association.

15. Termination: If the owner fails to make a payment under the terms of this Agreement, through no fault of the contractor, the contractor may, upon ten working days written notice to the owner, and if not satisfied, terminate this Agreement. The owner will be responsible for paying the contractor for all work completed.

If the contractor fails or neglects to carry out the terms of the contract, the owner, after ten working days written notice to the contractor, may terminate this Agreement.

Consultant's & Client's Limitation Of Liability Agreement

Loan Number: _____

This Agreement is made on 5/7/2012 between the Consultant and Borrower/Client. The Client hereby desires to engage the Consultant to preform services pertinent to the impliment on HUD's Mortgage Insurance Program as it pertains to the architectural concerns for the Property located below.

Property Address:

2022 Austin
Novi, MI

Borrower/Client: Ian Hadden

Consultant: Christopher J. Daggy
Property Inspection Engineers, Inc.

It is mutually understood and agreed to as follows.

1. **Feasibility Study:** The Consultant will accompany the Client, Client's Agent, and the Client's Contractor during a walk-through of the property, during which the property will be initially analyzed for compliance for the FHA 203(k) Rehabilitation Mortgage Insurance Program. The guidelines utilized are the Minimum Property Standard's (MPS) as set forth by HUD. The Consultant will note repairs that will be required to comply with the program. The Consultant may also make recommendations that would enhance the property above the MPS's. The Consultant will also discuss the repairs the Client desires above MPS's compliance. If the project moves forward a Specification of Repairs (SOR) will be drafted coordinating all of the construction items.
2. It is understood that the Feasibility Study and the inspection for the study will only include those items required by for compliance by HUD and does not constitute a Pre Purchase Inspection.
3. Consultant agrees to perform a Visual Inspection only of the Property.
4. Consultant is Not Responsible for Third Party Use or Misinterpretation of the Report.
5. If a Potentially Hazardous Situation is discovered, the Consultant will attempt to notify owner of the Property.
6. The Maximum Liability for the Consultant is limited to the cost of the Inspection.
7. **DISPUTES:** The Client must place all disputes to the Consultant in writing. The Consultant must be allowed to access to the Property for Re-inspection. If agreement cannot be reached between the parties; Disputes must be settled in arbitration according to the rules set forth by the American Arbitration Association. Judgment will be entered into the court having jurisdiction. If the dispute is settled in favor of the Company, then the Client shall be responsible for re-inspection fees, arbitration costs and attorney fees.
8. **Scope of Inspection:** The scope of the inspection is strictly limited as set forth in this agreement. The inspection is intended to be a non-destructive examination of the general functioning of the building, its components and equipment. The examination is limited to visual and normal consumer operational techniques. Defects of the building, its components and equipment which are visually observable at the time of the inspection will be reported according to the Standards of Practice of the American Society of Home Inspectors, Inc. Therefore, defects or deficiencies that are not required by those ASHI Standards will not be included in the Inspection or Report. Copies of the ASHI Standards are available upon request at any time including before the start of the inspection. The inspection is not compliance or certification for any past and current governmental standards (MPS only).
9. **Inspection Requirements and Limitations:** The building, its components and equipment, are to be ready and accessible at the time of the inspection. All utilities and pilot lights must be on and all equipment operational so the total inspection can be completed on that date. This is the responsibility of the client. The inspector is not obligated to change light bulbs, light pilots, move furniture, move obstructions, or remove floor coverings, or remove panels to inspect any part of the building or its equipment.
10. **The Following Specific Limitations Apply:** Design problems and adequacy are not within the scope of this inspection. The Consultant will not determine the operational capacity, quality or suitability for a particular use of items inspected. No engineering, scientific or specialized technician test or evaluation will be made by the Consultant. No test samples or readings will be taken in any part of the "building". Swimming pool, steamer, whirlpool tub or spa if present will not be checked. The draft on the fireplace will not be checked. To prevent damage to units, air conditioning will not be checked when the outside temperature is below 60 degrees (Prior 24 hours) nor a heat pump when the temperature is above 60 degrees. The inspection report will not include cosmetic items such as minor scratches, scrapes, dents, cracks, stains, soiled or faded surfaces on the structure or equipment, soiled, faded torn or dirty floor, wall or window coverings.
11. The Consultant has no liability for latent defects. This includes but is not limited to latent defects that cannot be observed through normal equipment operation. It is specifically agreed and understood that: Mechanical devices and structural components may be functional at the time of the inspection and later malfunction.
12. The Feasibility Study is not a substitute for a Pre Purchase Inspection.
13. Additional information and details concerning the nature of the inspection are found in the body of the report should be read carefully.
14. The Client recognizes that there is no representation, warranty or guarantee on the future life for systems and items

Loan Number:

inspected. The Client recognizes that the Consultant is not a guarantor or insurer of the inspected systems components, and items. The consultant is not responsible for reporting compliance or non-compliance with any building, electrical, mechanical or plumbing codes established by municipal ordinances or otherwise on the building, systems, or items therein. Any general comments, which may appear about these systems and conditions, are provided as a courtesy only and do not represent or form a part of the inspection.

15. Other Limitations: The inspection and report does not address and are not intended to address the possible presence of or danger from asbestos, radon gas, lead paint, UREA formaldehyde, wood destroying organisms (mold, mildew), soil contamination and other indoor and outdoor pollutants, toxic or flammable chemicals, water or airborne related illness or disease, and all other similar or potentially harmful substances or environmental conditions. The Client is urged to contact a competent specialist if information, identification or testing of the above is desired. In addition the presence or absence of rodents is also not covered by this inspection.

16. In addition the following are not inspected in the inspection: security systems; central vacuum; sheds; out buildings; personal property; accuracy of thermostat or timers; utilities; elevators; water softeners; lawn sprinklers; condition of furnace(s) heat exchanger(s); appliances; playground equipment; swimming pools, steamers, spas; energy efficiency measurements; recreational equipment; concealed or underground electric or plumbing; private sewer systems; water wells; buried tanks; environmental contamination; heating system accessories; solar heating systems; sewer lines (recommend "scoping" sewer lines); zoning or other ordinances; or building codes conformity. The Client understands that these systems and conditions and information about them are excluded from this Inspection and Report.

17. The parties agree and understand that Consultant is neither an insurer nor guarantor against defects in the building and improvements, systems or components inspected. Consultant makes no warranty, express or implied, as to fitness for use or condition of the systems or components inspected.

18. This inspection is not intended to be technically exhaustive nor is it considered to be a guarantee or warranty, expressed or implied, regarding the conditions of the property, items and systems inspected and it should not be relied on as such. Neither the Company nor its Inspector shall be held responsible or liable for any repairs or replacements with regard to this property, systems, components, or the contents therein.

19. Company is not responsible for the performance, competence, test results of any third parties either utilized or referred.

20. Payment is due upon completion of the Inspection. A \$20.00 returned check fee will be assessed for returned checks. Client is responsible for all fees required to collect payment for services rendered.

21. This Agreement shall constitute the entire agreement between the parties and shall be binding on the parties, heirs, successors, executors, and assigns.

22. Statute of Limitations: No suite or actions shall be brought against Consultant for a breach of this agreement at any time beyond one (1) year after the accrual of the cause of action thereof.

23. Litigation: Should a party to this agreement make any claim or file any lawsuit against Consultant shall pay all damages, expenses, costs and attorney fees for the Consultant if the complaining party does not win.

ACCEPTANCE AND UNDERSTANDING OF THIS AGREEMENT ARE HEREBY ACKNOWLEDGED:

Note: Homeowner wants no bridge cabinet over fridge

8.2) Kitchen Granite Calculations (for Reference)

Logic: a) 1 ft of cabinet counter length is 25 1/2 inches deep ... or 2 ft and 1 1/2 inches ... or 2.125 ft

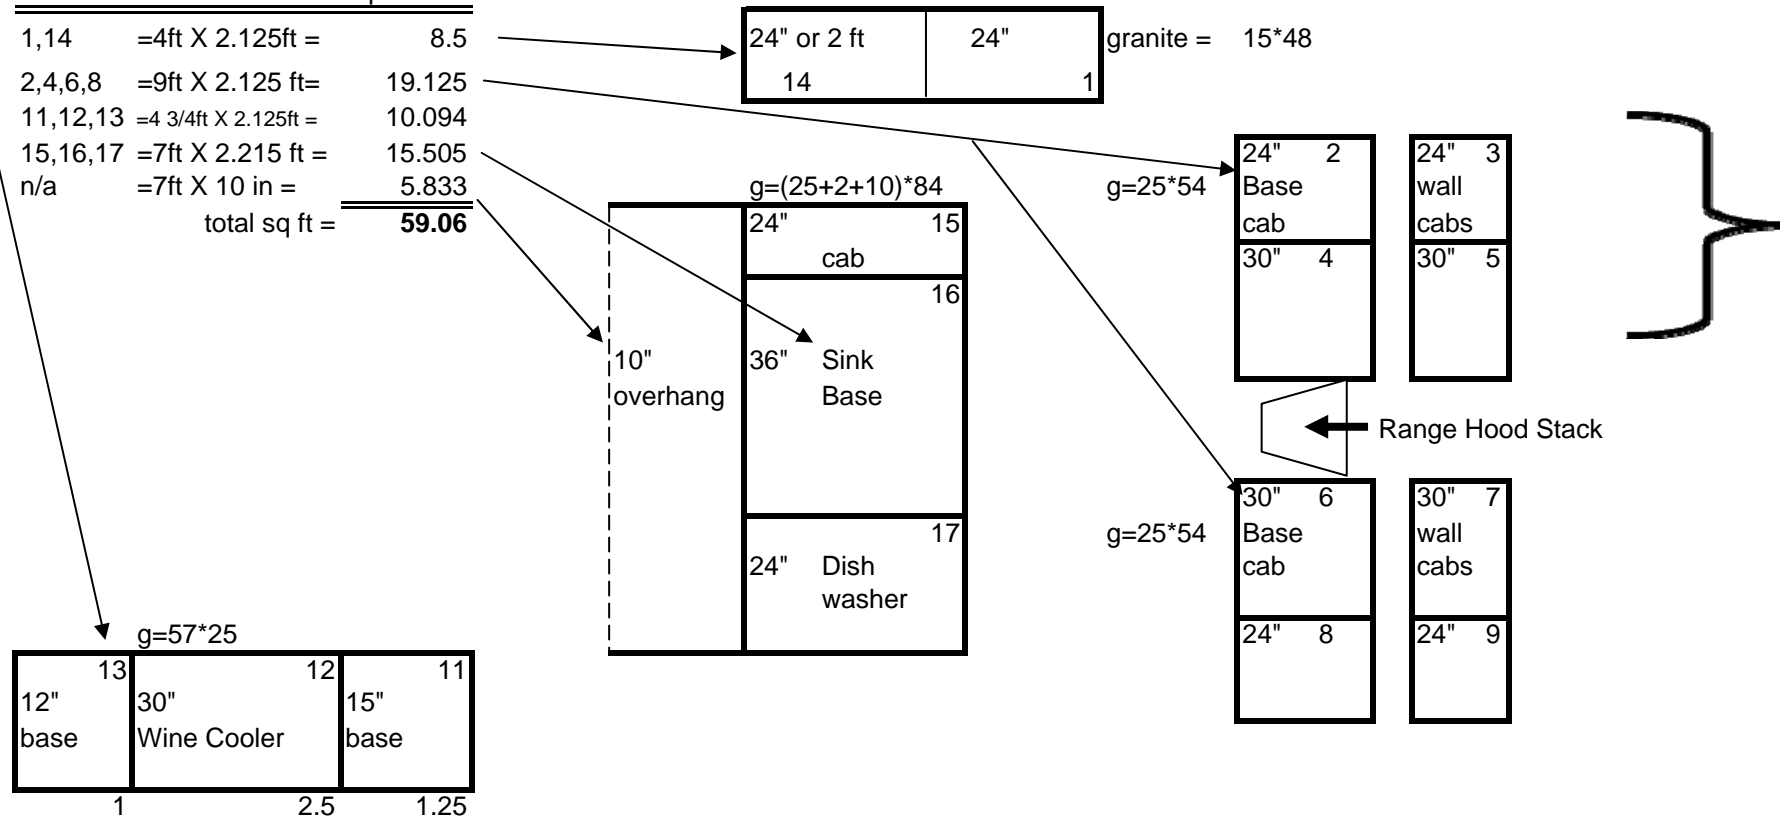

b) Adding up Cabinet section by cabinet section we have **59.06** sq ft of Granite.

b) Our vendor, Fantastic Granite of Royal Oak, MI, charges \$41 sqft to install a light beige, uniform granite

c) $59.06 * \$41 =$ \$ **2,421.46**

Fantastic Granite absorbs "cut wastage"

	Location #s	calc	sqft
Entert. Wall	1,14	=4ft X 2.125ft =	8.5
Main Oven Wall	2,4,6,8	=9ft X 2.125 ft=	19.125
Wine Cooler Wall	11,12,13	=4 3/4ft X 2.125ft =	10.094
Island Cab	15,16,17	=7ft X 2.215 ft =	15.505
Island Overhang	n/a	=7ft X 10 in =	5.833
		total sq ft =	59.06
